13 Amazing Pets Who Saved Their Owners

A 2013 study in Animal Cognition suggested that dogs do indeed have long-term memory, so it makes sense that they might be able to recognize their pups. But the fact is that it depends on a number of factors, like how long they've been separated. If they did remember, it might be similar to a human "meeting a person on the street and not realizing at first this was a friend from years past ...

Do Adult Dogs Still Recognize Their Mothers? | Psychology ...

Dog memory depends more on imprinting, a biochemical process stimulated by sight and smell. Imprinting is an innate behavior or response to a learned stimulus and occurs at a particular time in an animal's life known as "the sensitive time." This happens in a mother dog after giving birth and triggers her protective instinct.

Can Female Dogs Recognize Their Offspring in Later Years ...

" It's My Life " is a song written by Brill Building songwriters Roger Atkins and Carl D'Errico. The song was originally performed by English R&B band The Animals, who released it as a single in October 1965 (see 1965 in music). The song became a hit in several countries and has since been recorded by multiple artists.

It's My Life (The Animals song) - Wikipedia

A puppy is a juvenile dog. Some puppies can weigh 1–1.5 kg (1-3 lb), while larger ones can weigh up to 7–11 kg (15-23 lb). All healthy puppies grow quickly after birth. A puppy's coat color may change as the puppy grows older, as is commonly seen in breeds such as the Yorkshire Terrier.
