I have used the TX SR875 the last 5 years, and it is a good piece of audio gear. It has good power, and a very clean sound. It runs very hot, but it is the way this amps works, so it is OK, you have to place it so it can breathe. I now only use the pre-front, of the Onkyo, and an Emotiva power amp.

I have a question and I haven't quite gotten an answer to it. I have an Onkyo TX-SR875 receiver. My speakers are rated down to 36Hz @ +/- 3dB. I'd like to set it's high pass to play down to 40 or 50Hz, but still have the subwoofer also play 80Hz and below. Does this actually work if I set the Fronts to 40-50Hz and the sub crossover to 80Hz?
