Read: 3-mers: De Bruijn Graph GAT The length of overlaps is $k-1=2$. Gray arrows indicate where all the k-mers derived from the one read are placed in the graph. Blue arrows indicate the order of the k-mers and their overlaps. By reducing the entire data set down to k-mer overlaps the de Bruijn graph reduces the high redundancy in short-read data ...

De Novo Assembly Using Illumina Reads

with the tags in order to read and update them, RFID technology is often used to track large inventories such as evidence stored in property rooms. By using a handheld reader, law enforcement personnel can easily inventory a property room without opening storage containers or physically touching evidence. This eliminates

RFID Evidence Management TechNote

The signal from the reader activates the tag and provides enough energy for the tag to transmit data in response. Passive tags are much less expensive, but have a greatly reduced transmission range of about 10 feet. Both active and passive RFID tags are available in read-only and writeable formats. Figure 3.
