Associates Test

The Remote Associates Test (RAT) is a test of creative potential. It was developed by Martha Mednick in 1962 and has since been considered as a valid measure of creativity. Each RAT question presents three cue words that are linked by a fourth word, which is the correct answer.

Answers

The Remote Associates Test (RAT) was developed by Sarnoff Mednick in the 1960s as a test used to measure creative convergent thinking. Each question on the RAT test lists a group of words, and requires that we provide a single extra word that will link all the others together. Often, these words can be

thinking, especially creativity. One of the most influential models emphasizing associative processes in creative thinking was introduced by Mednick (Psychological Review, 69, 220-232, 1962), who developed the remote associates test (RAT) as a domain-general measure of individual differences in associative hierarchies.
